SUMMARY

Computer Science undergraduate at VIT Bhopal University with hands-on experience across full-stack web development, Agentic AI, and applied machine learning. Built a full-stack video-calling platform using JavaScript, WebRTC, and Firebase, and an NLP-based support-ticket classification pipeline using Pandas and a BERT transformer model. Gained practical exposure to multi-agent systems with LangChain and AutoGen, alongside industrial training in UAV manufacturing and testing. Proficient in Python, Java, C++, and React.js. Seeking to apply and grow these skills in a software development or applied AI role.

EXPERIENCE

- **Agentic AI Trainee | Cranes Varsity (CVPL) | Bangalore** (November 2025)
Completed hands-on training in Agentic AI and multi-agent systems, studying agent perception, reasoning, action, and learning components. Configured a single-purpose AI agent using LangChain and AutoGen to automate a web search and summarization task.
- **Industrial Trainee | NeoSky India Pvt. Ltd. | Bangalore** (November 2025)
Participated in an immersive industry experience focused on the manufacturing and testing ecosystem of commercial and defense-grade drones. Gained valuable insights into the technical fabrication and assembly processes of UAV components using advanced industrial machinery.

SKILLS

Programming Languages: Python, Java, C++, JavaScript

Web Development: HTML, CSS, React.js, WebRTC, Firebase

AI/Agentic Tools: LangChain, AutoGen

PROJECTS

- **VILOIR — Random Video Calling Platform for VIT Bhopal Students** (Aug 2024 - Nov 2024)
Designed and developed a college-exclusive random video calling web application, giving VIT Bhopal students a secure platform for real-time interaction. Implemented user authentication to verify student identity and maintain platform integrity. Built real-time peer-to-peer video calling using WebRTC for low-latency communication.
- **Smart Customer Ticket Routing System** (July 2026)
Developed a Natural Language Processing (NLP) model to automatically categorize incoming customer support tickets into distinct departmental queues (e.g., Technical, Billing, Sales). Engineered a text classification pipeline using Pandas for data preprocessing and a lightweight BERT transformer model to capture semantic context and extract urgency scores.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Sept 2023 – Present)

VIT Bhopal University, Bhopal, India | CGPA: 8.19

Senior Secondary Education XII (ICSE) (March 2022)

St. Francis' College, Lucknow, India | 72.35%

CERTIFICATIONS

- MATLAB Onramp — MathWorks
- TCS iON Career Edge - Young Professional — TCS iON
- The Bits and Bytes of Computer Networking — Coursera
- Machine Learning — NPTEL
- Data Fundamentals — IBM
